PROJECTS

Register Form with User Authentication

I got experience on building MERN stack Register/Login and user authentication backend.

URL Shortner

The application that allows users to long URLs into shorten. This short link redirects users to the original destination.

AI Chatbot

I build chatbot using openAI API. It utilizes artificial intelligence to simulate human conversation, allowing users to interact with a virtual agent through text or voice, providing responses to inquiries, completing tasks.

Comparative Analysis in Between HSPA+ and LTE (Academic)

The goal of this project is to examine the analysis of advanced LTE and HSPA+ under various frequency bands in order to meet these requirements.

QUALIFICATION

B.Tech in Electronics and Communications
From Vaagdevi College of Engineering, JNTU, Telangana
Passout 2024
CGPA 7.64

CERTIFICATIONS

React js course by **Scaler**

Full Stack MERN certificate issued by **Quality Thought infosystems**
